LANDSCAPE Tomas is designing a sculpture garden for an art museum. There is a sidewalk connecting the center of the museum entrance to the edge of the lawn. Tomas has a set of 4 sculptures in a series that he wants to be equidistant from this sidewalk. He plotted positions for Q and X on the graph. If pieces Q and R are a pair and X and Y are a pair, where will pieces R and Y be placed in the garden?

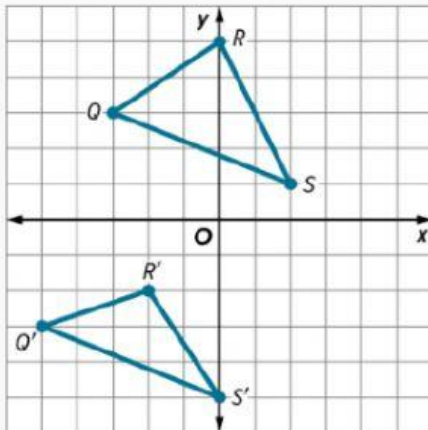

- ☐ A) $R(3, 1)$, $Y(4, 2)$
- ☐ B) $R(3, -1)$, $Y(4, -2)$
- ☐ C) $R(-3, 1)$, $Y(-4, 2)$
- ☐ D) $R(-3, -1)$, $Y(-4, -2)$

Translations

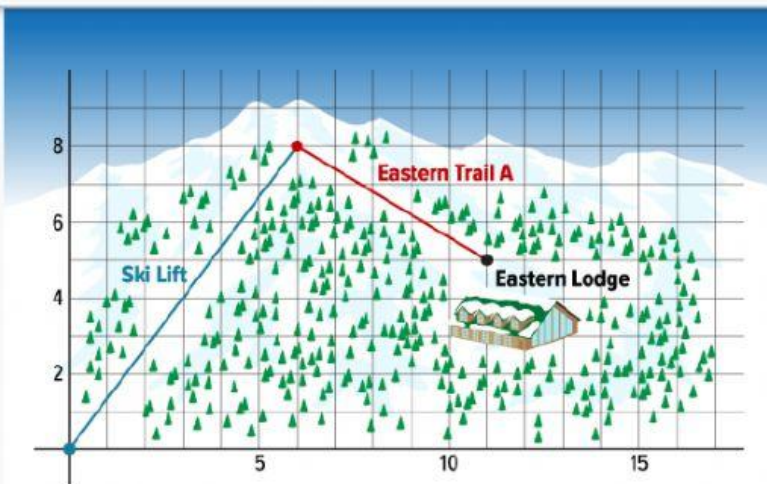

Determine whether a translation maps $\triangle QRS$ onto $\triangle Q'R'S'$. If so, find the translation vector. If not, explain why.

- ☐ A No; $\overline{RR'}$ is not the same length as $\overline{QQ'}$ or $\overline{SS'}$.
- ☐ B No; a reflection was applied.
- ☐ C yes; $\langle -2, -6 \rangle$.
- ☐ D yes; $\langle -2, -7 \rangle$.

SKIING Suzuki and Lucy are going cross country skiing. The ski lift will take them to the start of Eastern Trail A. They are planning to ski this trail and stop at the Eastern Lodge.

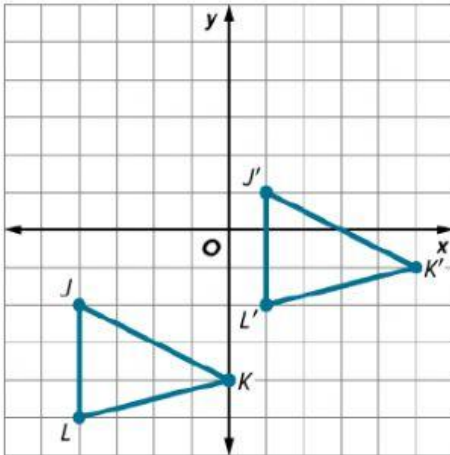

Their movement from the end of the ski lift to the lodge can be described as a translation along vector

- A. $\langle -5, -3 \rangle$
- B. $\langle -5, 3 \rangle$
- C. $\langle 5, -3 \rangle$
- D. $\langle -3, 5 \rangle$
