Reading Comprehension

Skill: Steps in process

Sequencing *means putting the events of a story in the order in which they happened.*

The students were so excited when their teacher told them they would be doing a super fun, indoor experiment. She gave each student the following on a piece of paper.

Supplies

- 1 cup All-Purpose Flour
- 1 tablespoon Cooking Oil
- 1/2 cup salt
- 1/2 cup warm water
- 2-3 drops food coloring

Instructions

1. Combine flour and salt in a medium bowl. Slowly stir in the oil, warm water, and 2-3 drops of food coloring until the mixture is well combined.
2. Transfer the dough to a flat surface and let it sit for a few minutes. It may feel a bit sticky, but DO NOT add more flour. As the dough sits, the salt will absorb the extra moisture. Knead well.
3. If your dough is sticky after about 5 minutes, add an additional 2 tablespoons of flour at a time until it is the perfect consistency.

Note

HOW TO STORE YOUR DIY PLAYDOUGH: Store in a zip-lock bag or airtight container, and place in the refrigerator. If you notice the playdough getting a bit dry, you can add a few drops of water and knead that into the dough.

Answer the following questions.

1. Select a conclusion, the students are making _____.

2. What does consistency mean in the story?

3. Write the numbers 1, 2, 3 and 4 to show the correct order.

____ Add an additional 2 tablespoons of flour at a time until it is the perfect thickness.

____ Slowly stir in the oil, warm water, and 2-3 drops of food coloring.

____ Combine flour and salt in a medium bowl.

____ Transfer the dough to a flat surface and let it sit for a few minutes.

4. Why should students store their dough in an airtight container?
