

## Geographical Features

### (English Language P4)

Fill in the missing words from the word bank:

|        |           |           |         |         |         |
|--------|-----------|-----------|---------|---------|---------|
| inside | difficult | Mountains | water   | plateau | lost    |
| height | river     | plain     | Canyons | same    | Valleys |

\_\_\_\_\_ are generally considered to be over 300 metres in \_\_\_\_\_. Mountains are usually more \_\_\_\_\_ to climb than hills. \_\_\_\_\_ are the flat spaces between where mountains or hills meet. There is usually a stream or \_\_\_\_\_ flowing through them. \_\_\_\_\_ are the area between cliff edges. Like valleys, they usually have bodies of \_\_\_\_\_ flowing through them. A huge area of flat land is called a \_\_\_\_\_. It is easy to get \_\_\_\_\_ on a plain if you don't have a compass, because everywhere can look the \_\_\_\_\_. A \_\_\_\_\_ is caused by wind and rain erosion as well as magma rising from \_\_\_\_\_ the Earth.
