QUADRILATERALS

Quadrilaterals are a two-dimensional shape with four sides of any length.

1. Use the diagram of the **parallelogram** below, which of the sentences below are true or false?

a All sides are equal in length.
b Opposite sides are equal.
c Opposite sides are parallel.
d All angles are 90°.
e Opposite angles are equal.
f The diagonals are equal in length.
g The diagonals bisect each other.
h The diagonals meet at right angles.

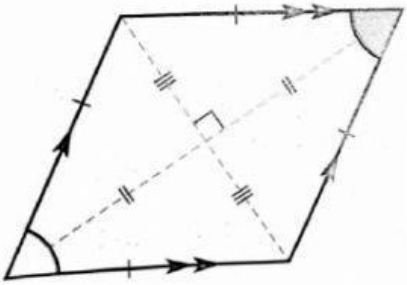

Parallelogram

2. Use the diagram of the **rhombus** below, which of the sentences below are true or false?

a All sides are equal in length.
b Opposite sides are equal.
c Opposite sides are parallel.
d All angles are 90°.
e Opposite angles are equal.
f The diagonals are equal in length.
g The diagonals bisect each other.
h The diagonals meet at right angles.

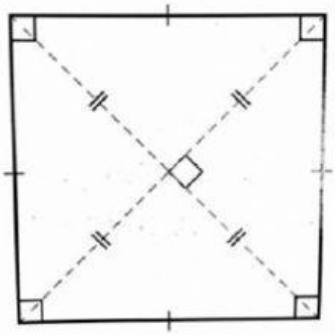

Rhombus

3. Use the diagram of the **square** below, which of the sentences below are true or false?

a All sides are equal in length.
b Opposite sides are equal.
c Opposite sides are parallel.
d All angles are 90°.
e Opposite angles are equal.
f The diagonals are equal in length.
g The diagonals bisect each other.
h The diagonals meet at right angles.
