

SIMPLE AND COMPLEX MACHINES

Read and listen:

A **machine** is an instrument that makes work easier. There are two types of machines: **simple machines** and **complex machines**.

Simple machines

- Simple machines often have one or two parts.
- Some simple machines are called **tools**.

pliers

screwdriver

bottle opener

pencil sharpener

Complex machines

- Complex machines have more than two parts.
- Sometimes they're a combination of different machines.

washing machine

electric drill

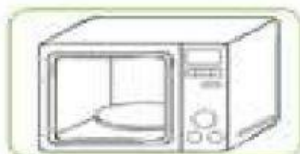

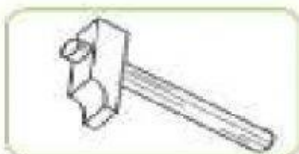

watch

bicycle
