

**Reporter:** Excuse me; I'm from the ABC Discovery Channel. May I ask you a few \_\_\_\_\_ (1) ?

**Mr Brown:** Sure.

**Reporter:** Your name is ....

**Mr Brown:** Eric Brown.

**Reporter:** Yes, Mr Brown. Why are you (2) \_\_\_\_\_ in this test flight in New York City?

**Mr Brown:** Well... I'm a businessman here in this city. You see... there are quite a lot of (3) \_\_\_\_\_ jams during the rush hours. I guess owning a (4) \_\_\_\_\_ car like this might be a good idea.

**Reporter:** I see. What do you like about this car?

**Mr Brown:** It's not... not too big, just a little bit bigger than a (5) \_\_\_\_\_ car. So when its wings (6) \_\_\_\_\_, it fits quite well in any garage. Second, it doesn't use too much (7) \_\_\_\_\_ - just five gallons per hour in the air and one (8) \_\_\_\_\_ per 50 km on the ground.

**Reporter:** How about its (9) \_\_\_\_\_?

**Mr Brown:** It's OK. It can reach (10) \_\_\_\_\_ km per hour on the ground and nearly (11) \_\_\_\_\_ in the air.

**Reporter:** Anything you don't like about it, Mr Brown?

**Mr Brown:** Yes. It needs a runway. That's the (12) \_\_\_\_\_ problem. What happens if it gets (13) \_\_\_\_\_ in traffic and cannot (14) \_\_\_\_\_ off?

**Reporter:** Yeah... Thank you very much for (15) \_\_\_\_\_ time with us...
