

**Vocabulary Test**

Ex.1. Complete the crossword below. \_\_\_/20

**ACROSS** →

- 1. muzejs
- 4. kliegt, kliedziens
- 5. Zeme
- 6. asteroīds
- 9. dinozaurs
- 11. kosmoss
- 14. dzīvs
- 15. robots
- 17. pazust, izzust
- 19. modelis
- 20. āda

↓ **DOWN**

- 2. skelets
- 3. miris
- 7. zinātnieks
- 8. biedējošs, drausmīgs
- 10. rēkt, rēciens
- 12. krist (Past Simple formā)
- 13. pētīt
- 16. raksts
- 18. akmens

**Ex. 2. Find a word for each definition. \_\_\_/5**

1. A pink bird with long legs. \_\_\_\_\_
2. The lowest part of a leg. \_\_\_\_\_
3. Son of your sibling (brother or sister). \_\_\_\_\_
4. A piece of clothing that you wrap around your neck. \_\_\_\_\_
5. Hard and bony structures that grow in your mouth. \_\_\_\_\_

**Ex. 3. Fill in the text with the words from the box. There are some extra words! \_\_\_/8**

**scientists skeleton pattern dead disappear skin huge science asteroid dinosaur fast**

Millions of years ago, long before there were any people, there were more than 700 different types of \_\_\_\_\_! Some dinosaurs were \_\_\_\_\_ and others were really small. The largest dinosaurs were over 30 meters long and up to 15 meters tall (e.g. diplodocus, brachiosaurus). The smallest dinosaurs were about the size of a chicken.

Some dinosaurs ate plants – they are called *herbivores*. Some could fly and others lived in the sea. Dinosaurs that ate meat are called *carnivores*. Some walked on two legs and others walked on four legs. Those who walked on two legs (e.g. Tyrannosaurus Rex) could move very \_\_\_\_\_, but those that walked on four legs were usually big and heavy, so they were much slower (e.g. stegosaurus).

We know they were all different, but no one knows what colour or \_\_\_\_\_ they were. This is because there is no dinosaur \_\_\_\_\_ left to study.

How did dinosaurs \_\_\_\_\_? Some \_\_\_\_\_ think that a large rock called an \_\_\_\_\_ fell to Earth from space. This made the Earth colder and there was no more food for dinosaurs to eat. Others think that because of the active eruption of volcanoes the sky grew black and poisonous gasses killed most of the life on earth. What do you think?

**Ex. 4. Write T (true) or F (false). \_\_\_/7**

1. Brachiosaurus was one of the smallest dinosaurs. \_\_\_\_\_
2. Carnivores ate meat. \_\_\_\_\_
3. The fastest dinosaurs walked on two legs. \_\_\_\_\_
4. All of the dinosaurs lived on the ground. \_\_\_\_\_
5. Tyrannosaurus Rex was heavy and slow dinosaur. \_\_\_\_\_
6. Some scientists think that an asteroid killed all the dinosaurs. \_\_\_\_\_
7. Scientists know that dinosaurs had many different skin patterns. \_\_\_\_\_

**Total: \_\_\_/40**

**Your mark: \_\_\_**
