

Generarting questions

Read the following types of rocks and then complete the questions below:

Types of space rocks

Comet – a ball of rock and ice that sends out a tail of gas and dust behind it. Bright comets only appear in our visible night sky about once every ten years.

Asteroid – a rock a few feet to several kms in diameter. Unlike comets, asteroids have no tail. Most are too small to cause any damage and burn up in the atmosphere. They appear to us as 'shooting stars'.

Meteoroid – part of an asteroid or comet.

Meteorite – what a meteoroid is called when it hits Earth.

What is..... ?

A rock without tail.

What is.....?

Is called hits hits Earth

What is.....?

a ball of rock and ice that sends out a tail of gas and dust behind it

What is.....?

part of an asteroid
