

EXAMINATION OF EVIDENCES

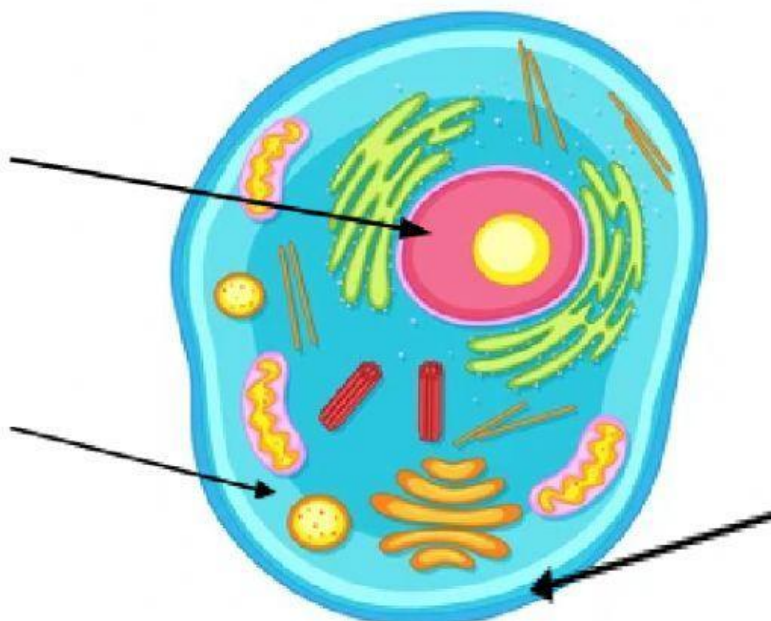

Name: _____

First, you have to show your training is going well is to see these two cells and distinguish what kind of cells they are (animal or plant cell) and then recognize the parts.

THIS IS A _____

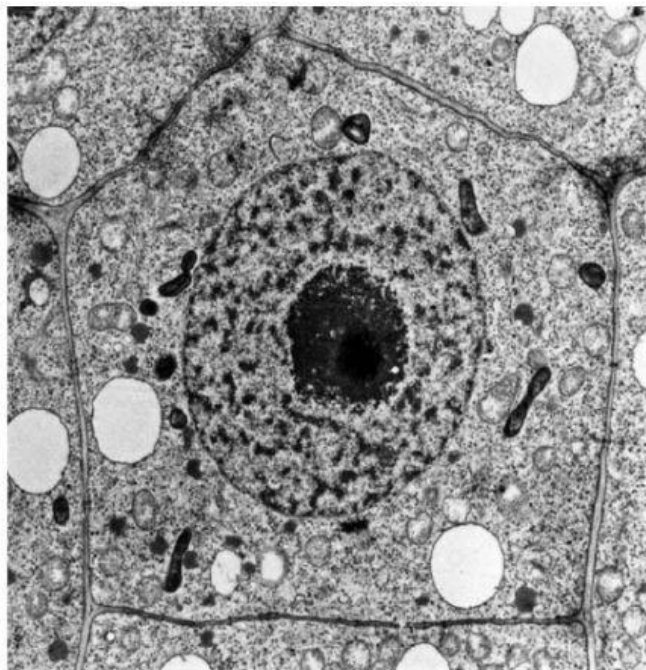

THIS IS A _____

Then, here you have some **evidences** found in the **crime scenario**. Look at them carefully and **try to distinguish if they are plant cells or animal cells**.

Your conclusion you come up with must be based on your own observations. Remember that all the evidence needed to classify the cell is right in front of you. Based on the evidence, justify your results in the place below the pictures, write as many reasons as you can (always based on your own observations).

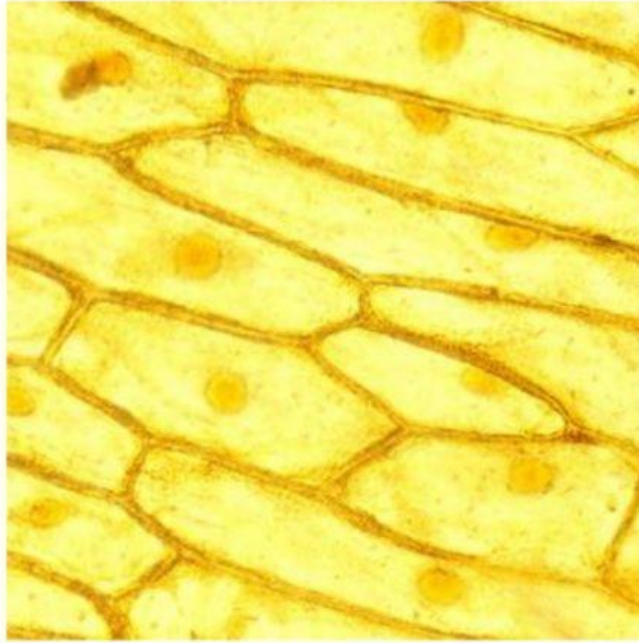

CELL 1
