

DIGESTIVE SYSTEM.

Match →

MOUTH

The liver produces
one of these liquids called bile.

ESOPHAGUS

In the small intestine
nutrients are absorbed by our body.

STOMACH

The food our body doesn't need
goes to the large intestine
and it leaves the body as a waste.

LIVER

In our mouth we chew food and mix it
with saliva to make it easier to swallow
and digest.

**SMALL
INTESTINE**

In the stomach, some liquids
break down food into nutrients.

**LARGE
INTESTINE**

Then food goes down the esophagus
into our stomach.
