LIVEWORKSHEETS

Animal Homes

Background knowledge

Animals can be found living in almost any place on Earth. The place where an animal normally lives is called its *habitat*. There are many different kinds of habitats, such as grass, under the ground, in a tree, in ponds, or rivers, on the seashore and in the ocean.

Science activity

Direction: Where would these animals normally live? Given 4 habitats below (pond, ocean, woodland and soil), identify and fill in the habitats of the animals in the table.

Pond

Ocean

Woodland

Soil

 worm	 water snail	 centipede

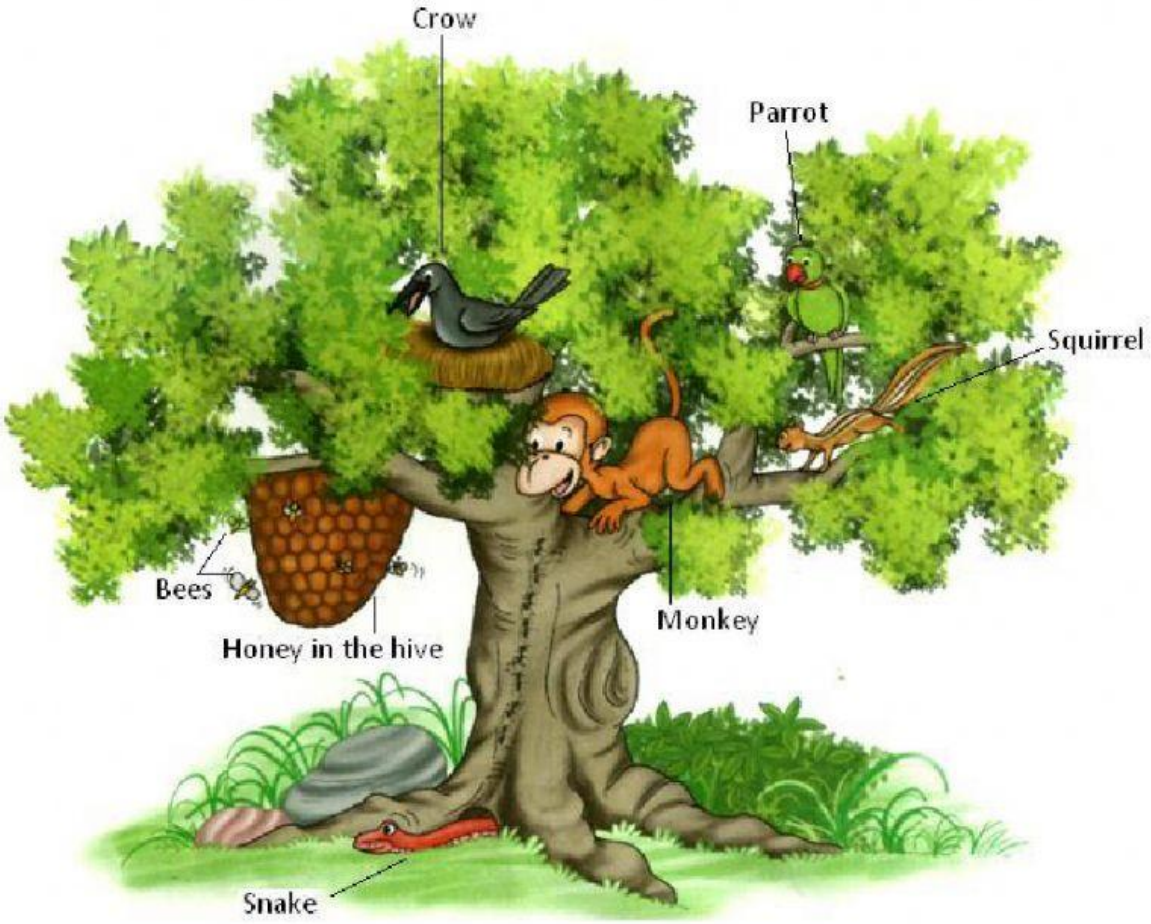

LIVEWORKSHEETS

 crab	 frog	 rabbit
 mackerel	 butterfly	 starfish
 woodpecker	 millipede	 stickleback

LIVEWORKSHEETS
