Animal Homes

Background knowledge

Animals can be found living in almost any place on Earth. The place where an animal normally lives is called its *habitat*. There are many different kinds of habitats, such as grass, under the ground, in a tree, in ponds, or rivers, on the seashore and in the ocean.

Science activity

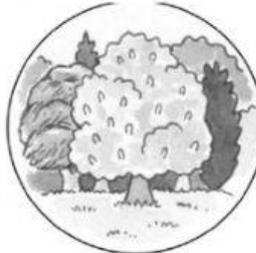

Direction: Where would these animals normally live? Given 4 habitats below (pond, ocean, woodland and soil), identify and fill in the habitats of the animals in the table.

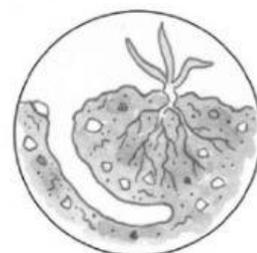

Pond

Ocean

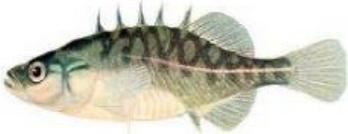

Woodland

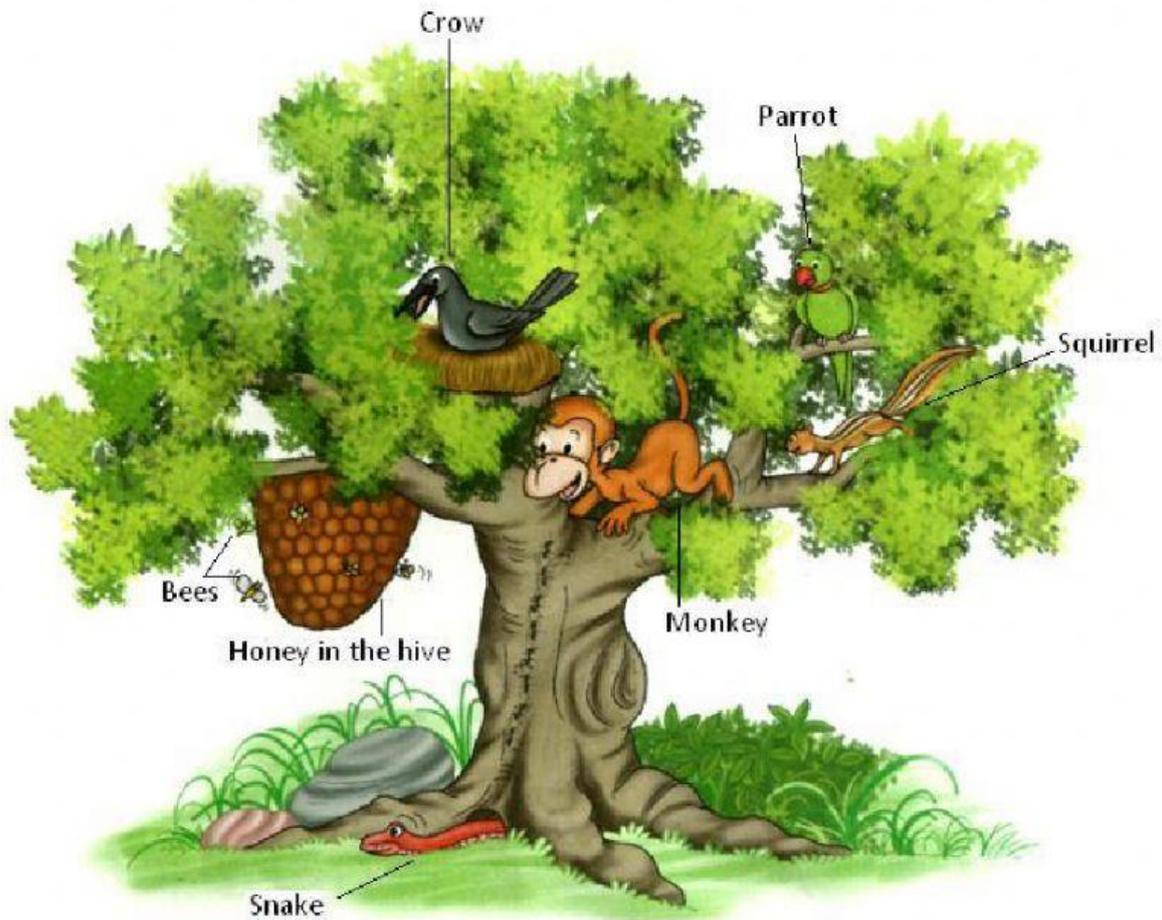

Soil
