

Fracciones Equivalentes

Encuentra las equivalencias de las siguientes fracciones dividiendo el numerador y denominador entre el mismo número.

Ejemplos:

$$\frac{10}{40} = \frac{5}{20}$$

(Note: Green arrows indicate division by 2 for both numerator and denominator.)

$$\frac{3}{6} = \frac{1}{2}$$

(Note: Green arrows indicate division by 3 for both numerator and denominator.)
