

Calculate the perimeter of each diagram below.

1)

$$3 \text{ cm} + 3 \text{ cm} + 3 \text{ cm} + 3 \text{ cm} = \boxed{} \text{ cm}^2$$

2)

$$2 \text{ cm} + 6 \text{ cm} + 2 \text{ cm} + 6 \text{ cm} = \boxed{} \text{ cm}^2$$

3)

$$4 \text{ cm} + 4 \text{ cm} + 4 \text{ cm} = \boxed{} \text{ cm}^2$$

4)

$$5 \text{ cm} + 15 \text{ cm} + 10 \text{ cm} = \boxed{} \text{ cm}^2$$

Calculate the area of the diagrams below.

1)

5 cm x 5 cm = **cm²** Type equation here.

2)

9 cm x 3 cm = **cm²**

3)

$\frac{1}{2}$ x 10 cm x 3 cm = **cm²**

4)

$\frac{1}{2}$ x 6 cm x 10 cm = **cm²**

Calculate the volume of the cubes and cuboid

1)

$$5 \text{ cm} \times 5 \text{ cm} \times 5 \text{ cm} = \boxed{} \text{ cm}^3$$

2)

$$16 \text{ cm} \times 2 \text{ cm} \times 4 \text{ cm} = \boxed{} \text{ cm}^3$$

3)

$$6 \text{ cm} \times 6 \text{ cm} \times 6 \text{ cm} = \boxed{} \text{ cm}^3$$

4)

$$18 \text{ cm} \times 3 \text{ cm} \times 6 \text{ cm} = \boxed{} \text{ cm}^3$$
