8. List four symptoms related to diabetes. (2)

LIVEWORKSHEETS

Match each diet-related disease to the best description listed below. (1pt ea.)

Disease	Description
Diabetes	This occurs when there is too much fatty substances in the blood.
Hypertension	These are infections or inflammations that occur in the intestine.
High Cholesterol	This occurs after high blood pressure damages the artery.
Constipation	When there is not enough insulin produced in the body to distribute glucose in the cells and body
Diverticular disease	When the bowel movement becomes delayed or fewer than usual.

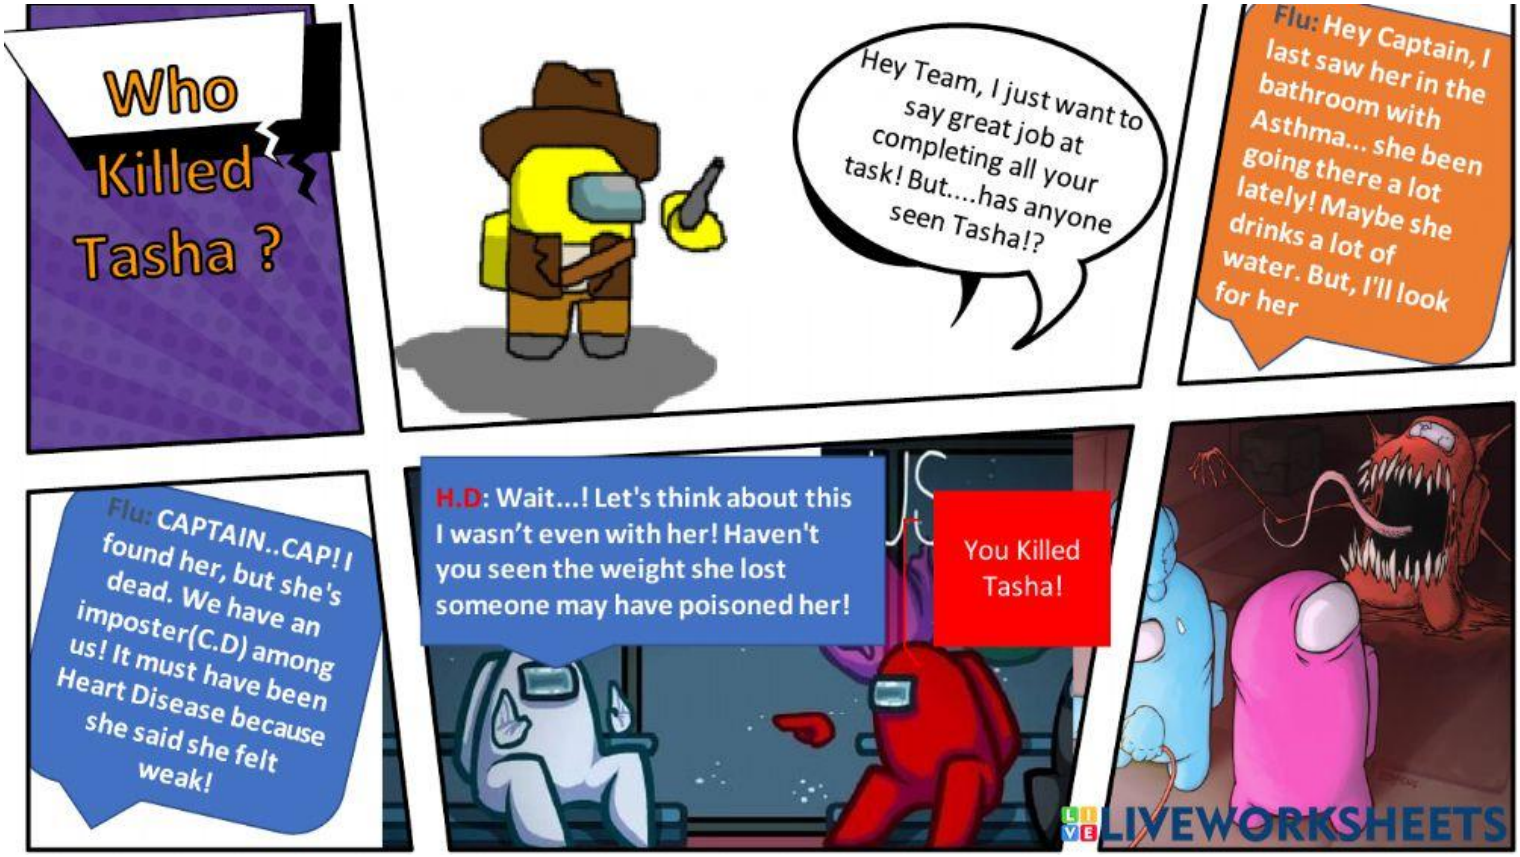

LIVEWORKSHEETS

Similar to the game, there are humans and imposters. In this case the humans represent Diseases that are NOT diet related and the imposters ARE diet related diseases.

Let's find out which Imposter (diet related) killed the humans (Non diet related) (5pts)

LIVEWORKSHEETS

Who Killed Tasha ?
Hey Team, I just want to say great job at completing all your task! But....has anyone seen Tasha!?
Flu: Hey Captain, I last saw her in the bathroom with Asthma... she been going there a lot lately! Maybe she drinks a lot of water. But, I'll look for her
Flu: CAPTAIN..CAP! I found her, but she's dead. We have an imposter(C.D) among us! It must have been Heart Disease because she said she felt weak!
H.D: Wait...! Let's think about this I wasn't even with her! Haven't you seen the weight she lost someone may have poisoned her!
You Killed Tasha!
