

Life Stages and Body Systems

Number the stages of the human life cycle in the right order.

1.
 3.
 5.
 6.

2.
 4.

Drag the system, function and part of the body to the correct place

| | | |
|--|--|---|
| <input type="text" value="processes food"/> | <input type="text" value="cleans the body of substances"/> | <input type="text" value="heart"/> |
| <input type="text" value="lungs"/> | <input type="text" value="stomach"/> | <input type="text" value="moves the blood around the body."/> |
| <input type="text" value="helps us breathe."/> | <input type="text" value="kidneys"/> | |

| System | Function | Parts of the Body |
|---------------------------|----------------------|----------------------|
| Digestive System | <input type="text"/> | <input type="text"/> |
| Circulatory System | <input type="text"/> | <input type="text"/> |
| Excretory System | <input type="text"/> | <input type="text"/> |
| Respiratory System | <input type="text"/> | <input type="text"/> |

Match the characteristics to living or non-living things.

grow

do not grow

do not begin life

begin life

die

do not die
