**Vitamins and Minerals**

Instead of providing your body with energy, vitamins and minerals work as \_\_\_\_\_ that help in your body's processes. Your body only needs a small amount of vitamins and minerals compared to carbohydrates, fats, and \_\_\_\_\_. Vitamins are made by living things. Vitamin C, for example, is found in \_\_\_\_\_, other fruits and dark green vegetables. It is essential for fighting infections.

Minerals are not made by living things, but can be found in food. Plants absorb minerals from the soil through their roots. When you eat plants or products from animals that eat plants, you get the minerals your body needs. Calcium, for example, can be found in milk. Your body uses \_\_\_\_\_ to build bones and teeth. Iron can be found in dark green vegetables, like spinach, and in red meat.
