

## ART FOR QUITO

The art of Quito are figures, paintings, churches, and among other things that we can see at a glance if we visit the city of Quito, some of these works do not have the name of the author as they have wanted it and prefer to remain anonymous.

The Quito workshops are places where people can go and make furniture, drawings and some other things, these things are then sold.

The Quito school is a place where paintings and works of art are created, these works remain anonymous and the authors are not known.

The architecture, thanks to this has created several churches and temples which are visited by tourists or people from the same place.
