

Renewable energy

1° Drag each picture to the right column.

Renewable energy	Non-Renewable energy

2° Put the words in the correct place.

hydraulic energy	wind power	solar energy

geothermal energy	Seawater energy	biomass energy

Coal	Petroleum	gas

3° Advantages and disadvantages. Explain what are the advantages and disadvantages of them.

4° Everyday examples.

The energy obtained is transformed into other things for daily use.

Give examples of the day to day in which the energy obtained from these renewable energies is transformed.

Example: solar energy = hot water. Wind energy = light in streetlights, etc.

hydraulic energy	
wind power	
solar energy	
geothermal energy	
Seawater energy	
biomass energy
