5.	The systematic circulation involves:	
5.		
5.	he systematic circulation involves:	
5.	The systematic circulation involves:  A) the passage of blood from the heart to the lungs and back.	
5.	The systematic circulation involves:  A) the passage of blood from the heart to the lungs and back.  B) The passage of blood from the heart to the body and back.	
	The systematic circulation involves:  A) the passage of blood from the heart to the lungs and back.  B) The passage of blood from the heart to the body and back.	
	The systematic circulation involves:  A) the passage of blood from the heart to the lungs and back.  B) The passage of blood from the heart to the body and back.  C) The passage of blood from the lungs to the heart and back.	
	The systematic circulation involves:  A) the passage of blood from the heart to the lungs and back.  B) The passage of blood from the heart to the body and back.  C) The passage of blood from the lungs to the heart and back.  Which of these is a correct list of the substances carried by the blood in the circulatory system?	
	The systematic circulation involves:  A) the passage of blood from the heart to the lungs and back.  B) The passage of blood from the heart to the body and back.  C) The passage of blood from the lungs to the heart and back.  Which of these is a correct list of the substances carried by the blood in the circulatory system?  A) nutrients, oxygen, carbon dioxide and other waste, hormones and digestive juices.	
	The systematic circulation involves:  A) the passage of blood from the heart to the lungs and back.  B) The passage of blood from the heart to the body and back.  C) The passage of blood from the lungs to the heart and back.  Which of these is a correct list of the substances carried by the blood in the circulatory system?  A) nutrients, oxygen, carbon dioxide and other waste, hormones and digestive juices.  B) oxygen, saliva, hormones, nutrients and disease fighting substances.	
	The systematic circulation involves:  A) the passage of blood from the heart to the lungs and back.  B) The passage of blood from the heart to the body and back.  C) The passage of blood from the lungs to the heart and back.  Which of these is a correct list of the substances carried by the blood in the circulatory system?  A) nutrients, oxygen, carbon dioxide and other waste, hormones and digestive juices.  B) oxygen, saliva, hormones, nutrients and disease fighting substances.	
	The systematic circulation involves:  A) the passage of blood from the heart to the lungs and back.  B) The passage of blood from the heart to the body and back.  C) The passage of blood from the lungs to the heart and back.  Which of these is a correct list of the substances carried by the blood in the circulatory system?  A) nutrients, oxygen, carbon dioxide and other waste, hormones and digestive juices.  B) oxygen, saliva, hormones, nutrients and disease fighting substances.
