a. Were I not      b. Was I not      c. Weren't I      d. If I am not

**C. Identify the one underlined word or phrase -A, B, C or D-that must be changed for the sentence to be correct.**

### III. READING

A. Fill in each blank space with one appropriate word from the box.

mortality      expanding      growth      increasing      reach      decline  
population      even      slightly      life      variations      available

#### WORLD POPULATION

Projections issued in 2000 showed the world population (31) \_\_\_\_\_ from 6.1 billion in 2000, to 7.9 billion in 2050. "High" and "low" projections for 2025 are 8.4 billion and 7.5 billion respectively. The average world birth rate is projected to (32) \_\_\_\_\_ from the 1990 level of 26 per 1,000 to 22 per 1,000 at the end of the century and to 17.6 per 1,000 in 2025 (corresponding to a fall in TFH from 3.3 in 1990 to 2.1 in 2025). Because of the (33) \_\_\_\_\_ share of the population at high-mortality ages, the average world death rate is expected to decline only (34) \_\_\_\_\_; from 9 (per 1,000) in 1990 to 8.4 in 2025. Average world (35) \_\_\_\_\_ expectancy, however, is projected

to rise from 65 years in 1990 to 71.3 years in 2025. Wide (36) \_\_\_\_\_ in population growth will undoubtedly persist. In the developed world, population growth will continue to be very low and in some nations will (37) \_\_\_\_\_ decline. Western Europe as a whole is projected to have a declining population after 2000. U.S. Census Bureau projections, assuming middle fertility and (38) \_\_\_\_\_ levels, show U.S. (39) \_\_\_\_\_ increasing from 250 million in 1990 to 349 million in 2025 and 420 million in 2050. Thereafter, (40) \_\_\_\_\_ would be virtually zero.
