Darken the circle in front of the correct answers.

Marks Earned:
Full Marks: 10

1. Which one of the followings is the method to make a sound from sound sources?
   (a) Movement
   (b) Swing
   (c) Vibration
2. Which one of the followings is the important benefit of source?
   (a) Make to fun.
   (b) Make to enjoyment.
   (c) Interpersonal communication
3. Which one of the followings is the motion characteristics of sound?
   (a) 360 degrees from the sound source
   (b) 360 degrees in the horizontal
   (c) Up top from the sound source.
4. Which one of the followings is not the media of sound?
   (a) Ground
   (b) Vacuum
   (c) Water
5. Which one of the followings is not the unit of frequency?
   (a) Round per second
   (b) Round per minute
   (c) Hertz

LIVEWORKSHEETS

6. Which one of the followings is correct about frequency?
   (a) Which of round for vibrate in 1 second
   (b) Which of round for vibrate in 1 minute
   (c) Which of round for vibrate in 30 second
7. How many times of vibration, human will can hearing?
   (a) 20-20;000 times
   (b) Less than 20-20,000 times
   (c) More than 20-20,000 times
8. Which one of the followings is the type of sound from high power of vibration?
   (a) High loudness sound
   (b) Low-pitched sound
   (c) Low loudness sound
9. Which one of the followings is the type of sound from low power of vibration?
   (a) High loudness sound
   (b) High-pitched sound
   (c) Low loudness sound
10. Which one of the followings is correct?
   (a) Sound travels through all media with the same speed.
   (b) When an object vibrates, we can hear the sound without any media.
   (c) The speed of sound depends on the type of medium and the temperature of the medium.
