

UNIT 7: WORLD OF ANIMALS

Lesson 6

Vocabulary

waterfall

island

cave

jungle

mountain

Exercise 1. Write the words next to the pictures.

waterfall ~~cave~~ jungle mountain rock island

a cave b c
d
e f

Exercise 2. Read the choose **True** or **False**.

An interesting animal An interesting island An interesting painting

AFRICA
MADAGASCAR

A habitat is the name for a place where animals and plants live. Let's look at the habitats on one island.

Madagascar is an island in the Indian Ocean. It's older than all the other islands in the world! Many plants and animals only live there, not in any other place. You can see waterfalls and mountains and there are caves under the ground.

A big jungle grows in one part of the island. It's very hot. Monkeys, snakes, parrots and other animals live there. Monkeys and parrots live in the trees and snakes live on the ground under rocks, but sometimes they climb up trees too.

jungle

cave

waterfall

mountains

1. Madagascar is younger than all the other islands.
2. The caves are under the ground.
3. Madagascar has waterfalls and mountains.
4. There is a small jungle in one part of the island.
5. Parrots live in the trees.
6. Snakes never climb up trees.
