

# Understand math

$$2+2=4$$

Now you get that  
Now solve this

$$1339+5370=$$

Understand that math gets harder the up you go.  
Now math's language is numbers like 1 2 3 4 5.

Solve these and get 10/10: -

$$12+53$$

$$35+35$$

Understand that if you have 2 and you + it with 2 you will get 4  
the same number you add you will get double the amount.

For example: -

3+3 will = to 6 because if Ashely had 6 chocolates and she gave  
3 to Sofi how much would she have left the ANS is 3.

Solve these: -

$3+3$

$6+6$

$7+7$

$35+35$

$46+46$

$72+72$

WELL DONE

**Let's do more**

Now multiply is just like pulse because it just goes more and more

For example: -

$2 \times 6 = 12$  because it goes like this

$2 \times 1 = 2$

$2 \times 2 = 4$

$2 \times 3 = 6$

$2 \times 4 = 8$

$2 \times 5 = 10$

It never stops.  
Do some more multiply!

$2 \times 4 =$

$5 \times 2 =$

$1 \times 3 =$

$2 \times 6 =$

$9 \times 5 =$

$7 \times 7 =$
