IAS is similar to other problems like gambling, smoking and drinking: addicts have dreams about the Internet; they need to use **it** first thing in the morning; they lie to their parents and partners about how much time they spent online; they wish they could cut down, but are unable to do so. A recent study found that many users spend up to 40 hours a week on the internet. Some of the addicts are teenagers who are already hooked on computer games and who find it very difficult to resist the game on the internet.
