

The Parts of an Atom - Complete the puzzle and then use the terms to label the diagram.

Down:

1. Extremely tiny, negatively charged particle found outside the nucleus
3. The part of an atom where most of the volume is located and where electrons are found
5. The center of an atom where nearly all mass of an atom is found

Across:

2. Massive Particle with no charge found in the nucleus of an atom
4. Massive positively charged particle found in the nucleus of an atom
