☐

5. Complete the following passage by using the helping words provided. You may use the word once, more than once or not at all. [5]

heartbeat	antibiotics	resistance	painkillers
addiction	appetite	anaesthetics	hunger

A drug is a substance that can change the way the human brain and body works. They may have medicinal use such as \_\_\_\_\_ that are used to treat diseases caused by bacteria. An example of this medicinal drug is penicillin. When a doctor prescribes penicillin, the patient must complete the course of the drug to prevent the bacteria from becoming \_\_\_\_\_.

Drugs can also harm to the human brain and body when taken excessively. \_\_\_\_\_ occurs when drug abusers become dependent on the drug and are unable to stop taking them. An example of a harmful drug is methylamphetamine, which when taken by drug abusers result in loss of \_\_\_\_\_ and increased \_\_\_\_\_.
