

Escribe operaciones con fracciones a partir de las siguientes fracciones

$$\boxed{\phantom{0}} + \boxed{\phantom{0}} = \frac{3}{4}$$

$$\boxed{\phantom{0}} - \boxed{\phantom{0}} = \frac{1}{10}$$

$$\boxed{\phantom{0}} + \boxed{\phantom{0}} = \frac{7}{12}$$

$$\boxed{\phantom{0}} - \boxed{\phantom{0}} = \frac{1}{6}$$

Calcula la fracción que falta en estas operaciones:

$$\boxed{\phantom{0}} + \frac{3}{8} = 1$$

$$\boxed{\phantom{0}} + \frac{3}{8} = 2$$

$$\boxed{\phantom{0}} + \frac{6}{12} = 1$$

$$\boxed{\phantom{0}} + \frac{4}{7} = 1$$

$$\boxed{\phantom{0}} + \frac{3}{5} = 2$$

$$\boxed{\phantom{0}} + \frac{6}{12} = 2$$
