

Pre- Reading

Think about the following Questions

1. Do you know where deserts exist in the world?
2. Are there any deserts in your country? In neighboring countries?
3. How can we prevent deserts from growing?

Vocabulary Preview

Write the letter of the word or phrase with the same meaning as the underlined word.

a. hurt

b. become wider

c. important; big

d. helpful

e. make something unusable

f. care for

1. _____ Deserts are not useful for growing food.
2. _____ Deserts can ruin farmland. Then no one can use it anymore.
3. _____ If you damage the land, you won't be able to grow as much food.
4. _____ People should treat the land well.
5. _____ If there is no rain for a long time, deserts can start to spread.
6. _____ Deserts getting bigger is a serious problem.

GROWING DESERT

There are deserts all over the world. They can be found in Africa, China, South America, and North America. In some places, deserts are growing. This is a serious problem because deserts destroy farmland and ruin land where animals live. When people cannot grow food or find animals to eat, they have to leave their homes.

Sometimes, nature can cause deserts to spread. Wind can move sand away from deserts and onto useful land. When there is no rain for a long time, plants die and deserts grow. However, humans can also cause deserts to grow. This is called desertification, and it happens in many ways. One way is when people cause too much air pollution, which can make an area hotter. Hotter weather can reduce the amount of rain as well. Too many people in one area can also damage the land. In addition, having many animals can harm the land. When large animals like cows walk on soil too much, they turn it into dust. The wind easily blows this dust away. Trees help hold water in the ground. When people cut down too many trees, less water stays in the ground, and the soil is ruined. All of these things can speed up desertification. To stop deserts from growing, people must think of ways to treat the land better.

6 sand: the rock powder on a beach or in a desert

10 pollution: something harmful to nature

10 reduce: to make smaller

12 harm: to hurt

13 soil: the earth; the dirt

13 dust: the powder from hard soil

13 easily: with no problem
