Extra! Extra! Read All About It!

Read *The Bat Bulletin*.

Write T if the statement is true. Write F if the statement is false.

There are more types of megabats than microbats.A bat has a tail.Bats have the same number of fingers as humans.All mammals have hair.Megabats live mostly in North America.Microbats are larger than megabats.Most bats are awake during the daytime.Bats are the only mammals that don't fly.It is possible that a microbat may like to eat mosquitoes.Megabats eat mostly fruit.
