### THEORETICAL PROBABILITY #1

**Directions:** *Theoretical probability* describes how likely it is that an event will happen. Use the probability chart below to decide whether each event below is impossible, unlikely, equally likely, likely, or certain to happen.

**Example:** A two sided coin is flipped and lands on tails.

$\frac{1}{2}$  --Equally likely

#### EVENT

#### PROBABILITY

- |   |       |
|---|-------|
| 1) A two-sided coin is flipped and lands on heads.                                  | _____ |
| 2) Roll a die and get a number greater than six.                                    | _____ |
| 3) Spin a spinner numbered 1-8, and you land on a number less than 3.               | _____ |
| 4) You will watch at least 1 hour of TV today.                                      | _____ |
