

A red box containing the number 100 has a blue dot on its right side. Nine orange arrows point from this dot to the first column of a table. The table has three columns: the first column contains addition problems (+1 to +9), the second column contains equals signs (=), and the third column contains empty boxes for the answers.

The number 100 is written in large blue and red font. A blue dot on the right side of the '00' has a red bracket next to it. Ten orange arrows point from this bracket to the first column of a table. The table has three columns: the first column contains addition problems (+10 to +19), the second column contains equals signs (=), and the third column contains the answer 110 for the first row and empty boxes for the others.
