

## Plant sexual and asexual reproduction

1. Parts of the flower: Drag and drop the name of the part of the flower to the correct picture. 

*Pistil*

*Stamen*

*Petal*

*Sepal*

2. Asexual reproduction: Match the picture and the definition of the different methods. 

 *Stolons: Stems that grow horizontally above the ground.*

 *Rhizomes: Stems that grow horizontally under the ground.*

 *Bulbs: Underground stems that store food. Roots grow from the bottom.*

 *Tubers: Underground stems that develop roots from growing point called eyes.*
