

# Función Lineal

## Intersección con los Ejes y gráficas (Ficha 02)

- Calcula los puntos de intersección con los Ejes de las siguientes Funciones Lineales.

$$f(x) = 6x + 6$$

| $x$ | $f(x)$ |
|-----|--------|
| 0   |        |
|     | 0      |

$$f(x) = -3x + 6$$

| $x$ | $f(x)$ |
|-----|--------|
| 0   |        |
|     | 0      |

$$f(x) = 2x - 8$$

| $x$ | $f(x)$ |
|-----|--------|
| 0   |        |
|     | 0      |

$$f(x) = -4x - 4$$

| $x$ | $f(x)$ |
|-----|--------|
| 0   |        |
|     | 0      |

$$f(x) = 5x - 15$$

| $x$ | $f(x)$ |
|-----|--------|
| 0   |        |
|     | 0      |

$$f(x) = -2x - 10$$

| $x$ | $f(x)$ |
|-----|--------|
| 0   |        |
|     | 0      |

- Selecciona la función lineal que le corresponde a cada gráfica.
