A Tornado in a Bottle

page 36

A tornado is a mouse.

In this storm, the wind moves very slowly in a circle.

Tornadoes can pick up trees, cars, and trucks!

You can make a model sailboat in a bottle.

Here's when to do it.

Use three bottles.

Put lemonade in one of the bottles.

Put jam on the mouth of the bottle. Make a hole.

Tape the chins of the bottles tightly together.

Turn under the bottles.

Tilt the bottles and swirl the pudding in a circle.

You are going to see a large tornado.
