

Six bags of soil are used to fill 5 flower pots. How much soil does each flower pot use? Between what two whole numbers does the answer lie?

Each flower pot uses $\frac{\boxed{}}{\boxed{}}$, or $\boxed{} \frac{\boxed{}}{\boxed{}}$, of a bag of soil.

So, $6 \div 5 = \frac{\boxed{}}{\boxed{}}$.

The answer is between the whole numbers $\underline{\hspace{2cm}}$ and $\underline{\hspace{2cm}}$.

Forty meters of fabric are used to make 9 school banners. How many meters of fabric does each banner use? Between what two whole numbers does the answer lie?

Each banner uses $\frac{\boxed{}}{\boxed{}}$, or $\boxed{} \frac{\boxed{}}{\boxed{}}$, meters of fabric.

So, $40 \div 9 = \frac{\boxed{}}{\boxed{}}$.
