Parts of a flower
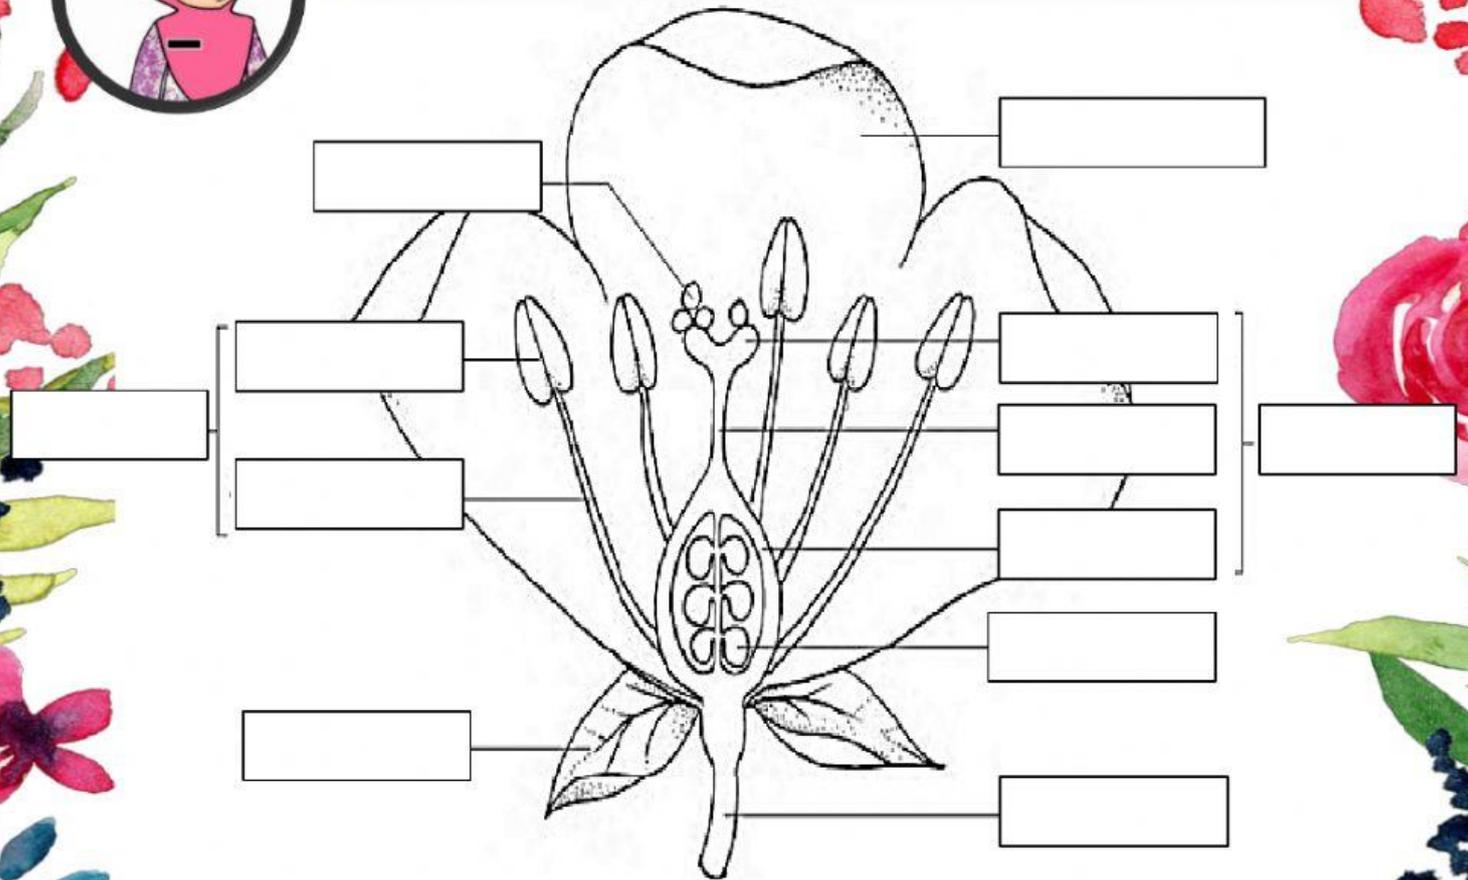

Assalamualaikum.. Can you help me to label the diagram below using the words given in the box provided?

| Petal | sepal | pistil | stalk | anther | pollen |
| ovary | stamen | style | ovule | filament | stigma |

Next, can you help me to choose the correct flower part for each function?

Functions	Flower Parts
This will develop into fruits. It contains ovules.	
It is the male part of the flower.	
It protects the young flower during the bud stage.	
It is the female part of the flower.	
It will develop into seeds.	
It holds the flower to the stem.	
It produces pollen	
It attracts insects.	
It receives pollen
