

## READING AND VOCABULARY

Some hospitals specialize in particular conditions like cancer or psychiatric illness. Other hospitals specialize in particular types of patients like geriatrics, children or the terminally ill. However, the best known type of hospital is the general hospital which deals with almost everything, has ambulance crews and beds for both intensive care and long stay.

A big general hospital has many different specialist departments. Identifying departments can be confusing because different hospitals use different names for the same thing. For example, one hospital may have a 'children's unit' which a different hospital calls 'Paediatrics'. 'Accident and Emergency' (A&E) in one hospital is called 'Casualty' in another.

There are many other examples. The department that specializes in heart problems, is sometimes called 'Coronary Care'. Others call it 'Cardiology' or 'Cardiovascular medicine'. Nephrology, the department that treats illnesses of the kidney is sometimes called 'the Renal Unit'. Gastroenterology (digestive system) is sometimes 'the Department of Hepatology'.

Hospital staff often use abbreviations for departments. For example, they refer to 'Obs and Gynae'. This is a department combining Obstetrics (pregnancy), and Gynaecology (women's reproductive organs). They call Otolaryngology, 'ENT' (ears, nose & throat), mostly because it is much easier to say.

### Vocabulary

Find terms in the text that mean the same as a-g.  
The first one is done for you.

- a mental health problems psychiatric illness
- b elderly people \_\_\_\_\_
- c people who are dying \_\_\_\_\_
- d paramedics \_\_\_\_\_
- e treatment for critically ill patients \_\_\_\_\_
- f stomach and intestines \_\_\_\_\_
- g uterus, ovaries and fallopian tubes \_\_\_\_\_

### Further vocabulary practice

Match department names 1-6 with parts of the body a-f.

| Department name    | Parts of the body |
|--------------------|-------------------|
| 1 Coronary Care    | a tonsils         |
| 2 Gynaecology      | b cervix          |
| 3 Obstetrics       | c bowel           |
| 4 Gastroenterology | d heart           |
| 5 ENT              | e kidneys         |
| 6 Nephrology       | f placenta        |
