

SEXTO GRADO

INTRODUCTION TO UNDERSTAN REPORTS.

LEE Y CONTESTA CON UN NUMRO PARA COMPLETAR LA IMAGEN DEL BOTE DE BASURA

12 Read the report and complete the diagram.

Trash Avalanche

Everybody makes trash. Babies, children, teenagers, adults—even pets! The average family throws away different kinds of garbage. Every week they put into the garbage can: 4 glass bottles or jars, 13 cans, 3 plastic bottles and 5 kilos of paper.

Our world is suffocating in garbage. Imagine putting together the garbage that each family makes—you end up with 8,000 tons of garbage EVERY DAY, and that is only in one city. That is the same as 1,600 elephants!

What can you do? **Reduce** the amount of garbage you produce. Use less plastic bags, less paper, less packages. **Reuse** things. Use paper plates and plastic glasses many times. **Recycle** your garbage. Take your glass jars, plastic bottles and cartons to recycling centers. **Together we can save our planet.**

glass = _____

cans = _____

plastic = _____

paper = _____

En el texto tienes oraciones de colores lee detenidamente y une el color de la columna con

La oración que le corresponde

► Match.
