

### EXERCISE 1. DRAFT, SKETCH OR PLAN?

## EXERCISE 2. FILL IN THE CHART.

The following table shows the similarities and differences between sketches, diagrammes and technical drawings.

|                                         | Sketch | Diagram | Technical Drawing |
|-----------------------------------------|--------|---------|-------------------|
| Done freehand                           |        |         |                   |
| Uses ruler, compass, protector...       |        |         |                   |
| Includes measurement and clarifications |        |         |                   |
| Done to scale                           |        |         |                   |
| Must be in proportion                   |        |         |                   |
| Is quit detalied                        |        |         |                   |
