| 5. A. Although | B. Because | C. However | D. So |

**II. Read the passage then answer the questions:**

There are many causes that lead to water pollution. One main cause of this issue is waste water coming from many factories and then being directly pulled out into water bodies, especially into rivers or seas without any treatment because this is the most convenient way of disposing waste water. Industrial waste consists of some kinds of chemical substances such as Sulphur, which is harmful for marine life. Lead is known as the main reason for cancer disease. Cancer has become a popular disease in several communes which are called "cancer villages". Another cause is the awareness of citizens, people always use water for many purposes and then they dump waste water or garbage directly into rivers, canals and ponds and so on. In 2004, because of a bird flu outbreak in Viet Nam, people threw poultry to water body that made water highly polluted.

1. How many causes of water pollutions are listed in the passage?
   A. one B. two C. three D. four
2. What do many factories do to their sewage?
   A. They treat it before dumping it into water bodies.
   B. They dump it directly into water bodies.
   C. They filter and reuse it.
   D. They sell it to the government.
3. What is the main reason for cancer disease?
   A. rice B. rain C. lead D. food
4. What is cancer called when it has become a popular disease in several communes?
   A. cancer grounds B. cancer offices C. cancer pollutions D. cancer villages
5. What did Vietnamese do in 2004?
   A. They bought dead poultry. B. They ate dead poultry.
   C. They threw dead poultry into water. D. They dig dead poultry underground.
