

3.5 Divide Integers

Evaluate each expression if
 $a = -2$, $b = -7$, $x = 8$, and $y = -4$.

16. $-64 \div x$

17. $\frac{16}{y}$

18. $x \div 24$

19. $\frac{a}{2}$

20. $ax \div y4$

21. $\frac{bx}{y}$

22. $2y \div 1$

23. $\frac{x}{ay}$

24. $-y \div a$

25. $x^2 \div y$

26. $\frac{ab}{1}$

27. $\frac{xy}{a}$

Outcomes

1. To divide integers with different signs
2. To divide integers with the same sign
