

IN THE OCEAN: FOOD CHAIN

Reference: Get Smart Plus 4 (page 132)

A. Choose the correct pictures to suit the information.

	→ Sun gives energy to plants.
 	→ Some plants are small but they are very important.
 	→ Small animals like jellyfish and big animals like turtles eat plants.
 	→ Big animals like octopus eat small animals. Some fish eat them too.
 	→ Sharks, whales and dolphins are very good at catching other animals.

B. Choose 'True' or 'False'.

1. Group one isn't very important for the food chain.
2. Jellyfish and green turtles eat plants.
3. The octopus doesn't eat animals.
4. Sharks are in the same group as green turtles.
5. Dolphins are bad at catching other animals.
