

I. Complete the table with the phrases below

carbon dioxide emissions/ carbon footprint / energy efficient / environmentally friendly
exhaust fumes/ fossil fuels/ global warming / greenhouse gases

| Good for the planet | Bad for the planet |
|-------------------------|--|
| <hr/> <hr/> <hr/> <hr/> | <i>carbon dioxide emissions</i> <hr/> <hr/> <hr/> <hr/> |

II. Choose the correct option to complete the text

We've just had a lesson on climate change at school. Mr Green explained how using forms of transport which produce a lot of

1  isn't environmentally friendly, and is causing 2  . Not only that, but 3  in cities are causing a lot of ill-health in the population. But he said things were getting better. Cars are becoming

much more energy efficient, and electric cars are becoming more popular.

They use less 4  – and the electricity they use is increasingly being produced by 5  in the form of 6  . So it's not all bad news!
