

YARDS to FEET

A. To convert yard to feet, multiply the number of yards by 3.

Directions: Convert the given measures to new units.

1. $12 \text{ yd} = \underline{\hspace{2cm}} \text{ ft}$
2. $13 \text{ yd} = \underline{\hspace{2cm}} \text{ ft}$
3. $14 \text{ yd} = \underline{\hspace{2cm}} \text{ ft}$
4. $15 \text{ yd} = \underline{\hspace{2cm}} \text{ ft}$
5. $16 \text{ yd} = \underline{\hspace{2cm}} \text{ ft}$

FEET TO YARDS

B. To convert feet to yard, we divide the number of feet by 3.

Directions: Convert the given measures to new units.

1. $36 \text{ ft} = \underline{\hspace{2cm}} \text{ yd}$
2. $39 \text{ ft} = \underline{\hspace{2cm}} \text{ yd}$
3. $42 \text{ ft} = \underline{\hspace{2cm}} \text{ yd}$
4. $45 \text{ ft} = \underline{\hspace{2cm}} \text{ yd}$
5. $48 \text{ ft} = \underline{\hspace{2cm}} \text{ yd}$

FEET TO INCHES

C. To convert ft to inches, multiply the number of ft by 12.

Directions: Convert the given measures to new units.

1. $12 \text{ ft} = \underline{\hspace{2cm}} \text{ in}$
2. $13 \text{ ft} = \underline{\hspace{2cm}} \text{ in}$
3. $14 \text{ ft} = \underline{\hspace{2cm}} \text{ in}$
4. $15 \text{ ft} = \underline{\hspace{2cm}} \text{ in}$
5. $16 \text{ ft} = \underline{\hspace{2cm}} \text{ in}$

INCHES to FEET

D. To convert "in" to ft, divide the number of "in" by 12.

DIRECTIONS: Convert the given measures to new units.

1. 144 in = _____ ft

2. 156 in = _____ ft

3. 168 in = _____ ft

4. 180 in = _____ ft

5. 192 in = _____ ft
