

DIVISIONES 1 cifra

- 1º Coloca
- 2º Resuelve
- 3º Completa los términos de la división

$584:3$

A division template for the problem 584:3. It features a dividend box with three columns (hundreds, tens, units) and a divisor box. A horizontal line separates the dividend from the quotient and remainder boxes. The quotient box has three columns, and the remainder box is to the right of the line. A curved line indicates the division process.

$538:2$

A division template for the problem 538:2. It features a dividend box with three columns (hundreds, tens, units) and a divisor box. A horizontal line separates the dividend from the quotient and remainder boxes. The quotient box has three columns, and the remainder box is to the right of the line. A curved line indicates the division process.

$375:4$

A division template for the problem 375:4. It features a dividend box with three columns (hundreds, tens, units) and a divisor box. A horizontal line separates the dividend from the quotient and remainder boxes. The quotient box has three columns, and the remainder box is to the right of the line. A curved line indicates the division process.

$825:5$

A division template for the problem 825:5. It features a dividend box with three columns (hundreds, tens, units) and a divisor box. A horizontal line separates the dividend from the quotient and remainder boxes. The quotient box has three columns, and the remainder box is to the right of the line. A curved line indicates the division process.

$447:6$

A division template for the problem 447:6. It features a dividend box with three columns (hundreds, tens, units) and a divisor box. A horizontal line separates the dividend from the quotient and remainder boxes. The quotient box has three columns, and the remainder box is to the right of the line. A curved line indicates the division process.

$612:7$

A division template for the problem 612:7. It features a dividend box with three columns (hundreds, tens, units) and a divisor box. A horizontal line separates the dividend from the quotient and remainder boxes. The quotient box has three columns, and the remainder box is to the right of the line. A curved line indicates the division process.
