Math Worksheet (Word Problem)

Name: _____ Number: _____

Directions: Solving word problem.

1. A box has 22  oranges and 36  apples. How many fruits are there in a box altogether?

$$\boxed{22} + \boxed{36} = \boxed{}$$

A box has $\boxed{22}$ oranges.
and $\boxed{}$ apples.

Altogether there are $\boxed{}$ of fruits in a box.

There are $\boxed{}$ fruits in a box altogether.

2. There are 25  parrots were sitting on the fence. 30 more  parrots came to join them. How many parrots are sitting on the fence in total?

$$\boxed{} + \boxed{} = \boxed{}$$

There are $\boxed{}$ parrots sitting on the fence.

There are $\boxed{}$ parrots came to join.

There are $\boxed{}$ parrots sitting on the fence in total.

There are $\boxed{}$ parrots  sitting on the fence in total.

3. Jack received a bag on his birthday. This bag has 43 dark chocolates and 36 white chocolates. Find the total number of chocolates.

$$\square + \square = \square$$

The bag has $\square$  dark chocolates.

The bag has $\square$  white chocolates.

Jack received $\square$ total number of chocolates.

Jack received $\square$ number of chocolates in total.
