Rubbish Races

Rubbish Races takes two teams of four and drops them in the middle of a ... rubbish tip. Then, the teams are given their assignment. In ten hours, they must design and build a machine, using only whatever they can find in the rubbish tip. The two 'inventions' then take part in a race to see which works the best.

Interested? Well, this week the Hammerheads are competing against the Thingamabobs to build a speedboat. The boat will have to be fast and able to carry two people: a pilot and a passenger.

B. Read the interviews and answer the questions below. Write H for Hammerheads, T for Thingamabobs or B for both.

1. Which team has to repair something?
2. Which team has used something from a vehicle?
3. Which team is optimistic?
4. Which team didn't have the opportunity to choose which engine to take?
5. Which team has almost finished their boat?

Cathy: Well, both teams have been working for about six hours now. Let's go and talk Jack from the Hammerhead team. Tell me about your boat, Jack.

Jack: To win this race, our boat will have to be as light as a feather. We've found four oil drums for the hull, which is perfect, because they float well.

Cathy: What about the two pontoons?

Jack: We've only been able to find one. So, we'll have to use that only.

Cathy: Won't that cause problems with stability?

Jack: We're working on it, but I think it'll be stable.

Cathy: I hope so. We wouldn't want to see it capsize or anything. Anyway, what are you going to do with those two car seats?

Jack: As soon as we finish with the pontoon, we'll attach them to the top of the oil drums. They will be for our pilot and passenger.

Cathy: Brilliant! So Jack, you only have four hours left. Will you have finished by then?

Jack: Definitely. We only have a little problem. We've found the perfect engine for our boat, taken from an old motorbike. It's small and light but it won't start. Not to worry though, we'll have fixed it by the time the race begins!

Cathy: I'll keep my fingers crossed for you.

Cathy: Now I'm going to talk to Marian of the Thingamabobs. Marian, is that your hull? What on earth is it?

Marian: It's the top part of a van.

Cathy: That's brilliant! But how much does that thing weigh?

Marian: Did you have to ask? I don't know. A lot! But it's as solid as a rock.

Cathy: And what are you using for an engine? It needs something powerful to rise out of the water.

Marian: Well, we searched for an engine, but we couldn't find one. Our opponents however, found two – a motorbike engine and a car diesel engine. They didn't want the diesel one, so our team captain made a trade with them and got it for us.

Cathy: But that thing weighs a ton!

Marian: I know, I just hope it gives our boat lots of power.

Cathy: You don't sound too optimistic!

Marian: I'm worried that this engine might be too heavy and our boat won't be fast enough.

Cathy: Are you sure it won't sink?

Marian: It'll float, don't you worry about that.

Cathy: Good luck, Marian!
