

## Guess these riddles to identify some of the natural disasters or hazards which affect the Caribbean region.

(earthquake, landslide, drought, flood, hurricane, volcano)

1. I am circular in motion with winds blowing around a calm centre known as the eye.
2. I am a special kind of mountain with a large opening at my peak. When I erupt I send out melted rocks and steam.
3. I am a great flow of water that rises and spreads over the land. I can cause much damage to anything in my path.
4. I cause sudden shaking on the land or under the sea. My strength, direction and length of time are measured by a seismograph.
5. No rain, no rain for such a long time. The land gets cracked and Oh so dry. Animals die and plants wither and humans too can also suffer.
6. Lots of rain and I move from the hills down to the low, taking anything in my way.

What am I?
