

## Post-Assessment

26<sup>th</sup> January – 2022

### Topic – Basics of Solving Equations

( Write YES or NO in the boxes)

1. Is  $y + 7 = 6$  an equation ?

2. In  $y + 7 = 6$  we find value of y ?

3. We will get one answer for y ?

4. To get answer we calculate on both sides of = sign

5. We will start to calculate from the side y is present ?

6. We first add  $-7$  on both sides ?

7. By adding  $-7$  we get value of y ?
